Final Project Design Mockup

Basic Info

Hidy Chan, hidychan@berkeley.edu, 3036694041

Coco Ma, coccoo.ma@berkeley.edu, 3036676114

Elaine Liang, elaineliang0124@berkeley.edu, 3036650790

Tiffany Lin, 1016tiffany@berkeley.edu 3036616392

Project Name

BearMeet

Problem Domain

Berkeley Student

Problem Overview

The Berkeley APP is not comprehensive enough. It was difficult to find a block of time that we could meet with friends within the university. And there are many different things that are essential to Berkeley students that weren't included in the Berkeley APP so we mainly want to add the schedule matching part and maybe some other new features if we have time.

1. Time Table
2. Schedule matching with 1 or more Berkeley student

Solution Overview

Centralize the schedule matching feature and some other new features (if we have time) in one app.

1. Use the app to generate multiple students' schedules on a calendar. Vividly display each person's schedule by using distinct colors.
2. Output: blocks that are free directly showing to users, allow users to choose which time they want to meet.
3. Use the rate my course feature to see the rate of a course by only Berkeley students.

Timeline

Week 04/11 - 04/17

- Brainstorm
- Design Mockup
- Figma

Week 04/18 - 04/24

- Back End
- Figma
- UI UX

Week 04/25 - 04/29

- Finalize
- Work on presenting the demo

Plan of Attack

- Attend Office Hour every Thursday Night
- Work on the project after the office hour if I have time
- Google search anything I don't know

Breakdown of Responsibilities

Hidy Chan: Back End

Coco Ma: Back End

Tiffany Lin: Front End

Elaine Liang: Front End
